

# **Music App Development**

## **SYMPHONY**

### **Members:**

- 1] Ashwath S
- 2] Haswanth P

### **Synopsis:**

We have developed a music application which is light-weight and is easy to use. It has a variety of features such as:

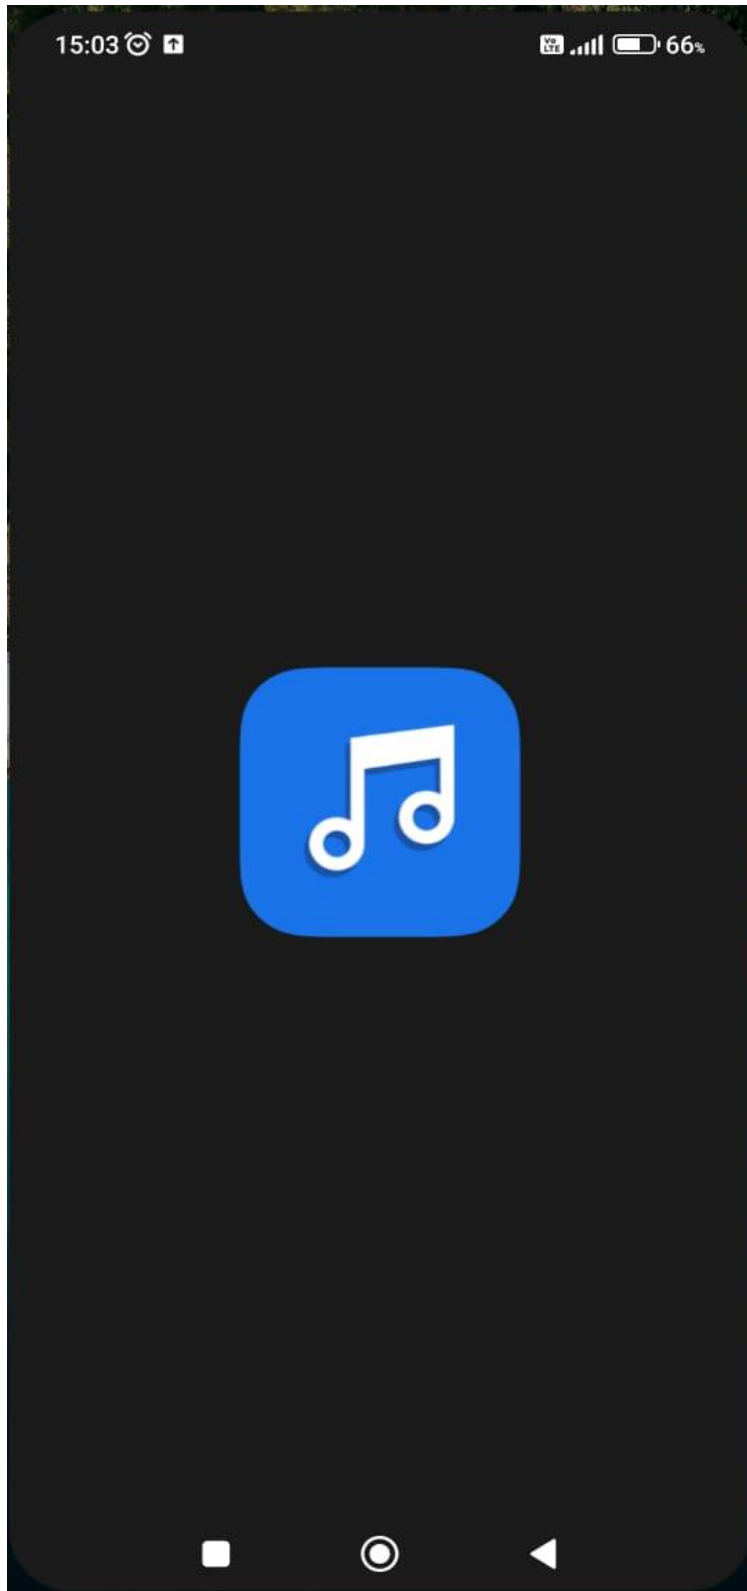

- 1]Download artists and album art
- 2]Gapless playback
- 3] Audio focus
- 4] Two themes light and dark

Other notable features include:

- 1] Blacklisting songs/albums
- 2] Library categories with albums, artists, genres, and playlists.

We have two different styles of now playing screen. Also, this app has the classical music player functionalities such as seek, skip, repeat, play/pause, shuffle. Near the top we have functions to display lyrics and make favorite buttons. We have added the functionality of queue also. Our app can also delete songs from phone memory.
